Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a system of call distribution to operator, classified in class 379, subclass 232.
 - II. Claims 17-35, 37, drawn to a method of call connection by trunk group, classified in class 379, subclass 232.
 - III. Claims 36, drawn to an inter-program communication for event handling or event notification.

2. Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I recites speech recognition, invention II recites the utility of trunk allocation with a specific procedure as claimed in claim 33, invention III bears utilities of accepting and identifying media event and media attributes. Those three limitations have their own patentability. Also, the speech recognition, trunk allocation and media identification are all have their own utility.

Art Unit: 2645

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Ms. Marilyn (972-480-8800) on 1-28-04 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this application and office action should be directed to the examiner Ming Chow whose telephone number is (703) 305-4817.
